

Inoperable Tumor Disappears:

Testimony of Maria Luisa Gutierrez Ortiz

Reprinted with kind permission from [GARABANDAL JOURNAL](#) January-February 2005

Excerpted from LOS MILAGROS O FAVORES DE NUESTRA MADRE DE GARABANDAL and translated from Spanish by Dr. Edward Serrano

I was operated on for cancer of the womb, which was removed in 1971. This was followed by periodic chest and abdomen x-rays at the hospital every three months.

In 1974, the doctors noticed something in one of my lungs and further tests revealed another tumor which was growing. I went to a different hospital, and the diagnosis was confirmed. They gave me two or three months to live. The tumor was inoperable.

A friend of mine, [Father Ramon Maria Andreu](#), had a crucifix and a medal kissed by the Virgin which he loaned me when I asked if I could borrow them. Fifteen days later, while wearing the medal, I went for my next checkup. After examining the new x-ray, the doctor said: "The x-ray doesn't show anything." So, in that short time the tumor completely disappeared.

I don't have enough words to properly thank Our Lady of Garabandal. If I spent every day on my knees thanking the Virgin for this miracle, it would not be enough.

I want this published. I feel very unworthy of having had this healing.

Signed: Maria Luisa Gutierrez Ortiz
